London, Feb. 12.—The decisive end of Amarchist Vaillant's career by the guillotine process on Mouday was not his litting the activity of his living conference as the French government hoped it would be. The execution of the venturesome enemy of society seems to have attreed up the "reds" all over Europe, and here in London as well. They have not furnished any forcible manifestation of their displeasure at the commendable one of the manifestation of their displeasure at the commendable one of the manifestation of the mani Lennon. Feb. 12.—The decisive end of Anarchist Vaillant's career by the guillotine process on Mouday was not so effective in stifling the activity of

type of which Vaillant was an excellent example and an attempt to emu-late his desperate deed would not be surprising. The police are extremely active in their efforts to destroy every possible opportunity for them to do so, but they have a herculean task before them, as they are learning in attempting to suppress the dangerous horde of bomb-throwers and dynamiters. A socialist newspaper asserts that there are more anarchiats in Paris to-day than there have ever been in its history, and declares they are thor-

organized to wage a persistent and systematic warfare upon society. In contrast to this statement is a report from Rome that Crispi's soldiers in Sicily have effectually stamped out the uprising among the flery Sicilians, which was started and fomented by the associate. Many of the associate, have sought refuge in flight. Several hundred of them are said to have taken passage to the United States and South America. In London the police think they have evidence of the piottings of snarchists toencouragean uprising

among the unemployed.

At a meeting of several thousand idle men at Tower Hill early in the week the speeches were of pronounced an-archistic flavor, and the police were threatened with extermination if they interfered with proposed meetings of the unemployed.

Half a dozen professional anarchist agitators directed the meeting, and gave it its lawless aspect. Since then the police have been extremely active in trying to ferret out the leaders, and it is probable that a number of ployed as the prevention of a repetition of the desperate outbreaks that have occurred on the continent.
